

City Gas Distribution Management

A Unique GIS & Engineering Fusion

Utilities are demanding information from disparate sources to be presented in a cohesive and insightful fashion for effective decision making. Emergency management, routine maintenance, inspection, flow management, after sales service at reduced cost are major concern of Gas distribution utility

Most of the utilities are maintaining the information required for their business processes in disparate systems such as Asset management system, CRM, Billing, SAP/ERP, and other in-house MIS databases. Critical information is required to be geographically referenced to increase visual understanding. Data duplication and synchronization are the major drawbacks of these disparate systems, along with heterogeneous business processes across various divisions.

There is a need to have analytical power on this business information to understand the complex trends & impact with spatial reference to understand network and business geographies. The importance of unified view of Utilities business processes across enterprise has lead to conceiving an integrated web based offering with Leak Management, Risk Management, Safety, Corrosion Management, Work order Management, Emergency Response, etc.

Rolta Geospatial Fusion™ solution along with Rolta OneView™ provides unique GIS and engineering fusion facilitating, real time access to critical metrics such as operational insight, assets insight, supply chain insight etc. to improve availability, expose risk proactively while communicating effectively.

Key Features

- Easy Configurable and ready to deploy solution across the enterprise
- Asynchronous Multi-Tier searches across multiple external applications
- Attribute level security for spatial and non spatial information
- Solution provides powerful API's to fulfill the individual needs of business
- Local language interface with multilingual support

Benefits

- Access to convergence of critical information in structured way
- Efficient maintenance response system for carrying out field activities
- Effective decision support for planning and emergency management
- Disseminate work process with centralized unified applications
- Web based secured access of spatial and non spatial information

Rolta India Limited

West

Central & Registered Office

Rolta Tower A,
Rolta Technology Park,
MIDC, Andheri (E),
Mumbai 400093.
Tel: +91 (22) 2926 6666
